MD SHAMSUR RAHMAN

Halifax, NS, Canada | mshamsur.eee@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Cybersecurity and GRC professional with a background in enterprise IT and telecommunications, including 3 years securing a large public-sector education environment in Canada that serves about 10,000 staff. Combines hands-on security operations (endpoint protection, identity and access management, patching and incident triage) with governance work: applying NIST CSF, NIST SP 800-53 and ISO 27001, communicating security policy, and reporting risk to leadership. Holds a Master of Engineering from Dalhousie University and CompTIA Security+ and Cisco CCNA certifications.

CORE COMPETENCIES

- **Governance, Risk and Compliance:** NIST CSF, NIST SP 800-53, ISO 27001, risk analysis and reporting, security policy and awareness, access control, documentation and process control, vendor coordination
- **Security Operations:** Endpoint security and EDR, security monitoring, incident triage and root-cause analysis, patch and vulnerability remediation, identity and access management (IAM), data loss prevention (DLP), network security

TECHNICAL SKILLS

- **Security Tools:** Microsoft Defender, FortiEDR, FortiGate, Microsoft Intune compliance policies, Microsoft Authenticator (MFA)
- **Azure Cloud and IAM:** Microsoft Azure, Microsoft Entra ID (Azure AD), Active Directory, role-based access control (RBAC), Conditional Access, multi-factor authentication (MFA), single sign-on (SSO), user provisioning and deprovisioning, group and role management
- **Endpoint and Collaboration Platforms:** Microsoft 365, Microsoft Intune, Google Admin, Apple School Manager, Mosyle
- **DNS and Email Security:** DNS management and troubleshooting, email authentication (SPF, DKIM, DMARC), phishing and spam filtering, email threat investigation
- **Reporting and Analysis:** Power BI, Microsoft Excel (PivotTables), risk statements, incident and technical reporting
- **Networking:** TCP/IP, routing and switching, firewalls, wireless, VoIP, IP and optical transmission
- **Service Management:** FreshService, incident documentation, process records

PROFESSIONAL EXPERIENCE

Technology Support Analyst

Halifax Regional Centre for Education (HRCE), Halifax, NS | November 2023 to Present

- Enforce endpoint security compliance across managed Windows, Apple and Chromebook devices using Microsoft Intune, Mosyle, Apple School Manager, Microsoft Defender and FortiEDR.
- Apply security patches and coordinate firewall-based updates to shorten exposure windows and flag anomalous device behaviour.

- Administer identity and access controls in Microsoft Entra ID, Active Directory and the GNSPES domain, supporting a single-device MFA policy and providing staff and student account support.
- Develop security awareness content for the HRCE Service Desk, including short videos and written guides on password policy, MFA re-enrolment and self-service password reset.
- Improve service desk process controls by reducing duplicate tickets, improving ticket categorization and raising new-employee awareness of IT policy.
- Triage, document and resolve security-related and Tier 2 incidents across Microsoft 365 and endpoint environments, maintaining a clear audit trail.
- Coordinate with vendors and service providers on technology upgrades, lead small projects, and brief school leadership on security considerations and remediation actions.

Senior System Engineer, Regional Operations
Grameenphone Ltd. (Telenor Group), Dhaka, Bangladesh | January 2009 to June 2021

- Investigated abnormal network performance and service incidents using structured root-cause analysis, producing incident reports and technical findings for management.
- Monitored and maintained national transmission and core network environments, applying preventive maintenance and fault-handling procedures to protect service availability.
- Configured routing and switching infrastructure and worked with network architects to implement resilient network designs.
- Coordinated with third-party vendors on upgrades, maintenance and issue resolution, tracking vendor work against service requirements.

PROJECTS AND CONTINUOUS LEARNING

- **Home SOC Lab:** Building and documenting a security operations lab for log monitoring and detection practice.
- **TryHackMe:** Hands-on labs in security operations, including the Security Engineer learning path.

EDUCATION

Master of Engineering (MEng), Internetworking, specialization in Network and Cyber Security
Dalhousie University, Halifax, NS | 2023

Bachelor of Engineering, Electrical and Electronic Engineering
University of Information Technology and Sciences, Bangladesh | 2011

CERTIFICATIONS

- CompTIA Security+
- Cisco Certified Network Associate (CCNA)
- CompTIA A+
